# Cyber Security for Critical Client Protection

**Every world-class MSP should be able to provide this next level of security to clients, and now you can.**

As a trusted LabTech Software® partner, you know what it takes to neutralize security threats for your clients. As a professional, you know nothing is foolproof. They are still vulnerable even with Firewalls and Antimalware. Now you can stand out as the leading provider of critical client protection.

Close security holes left open to cyber security vulnerabilities like data theft, lost laptops, viruses and malware. Build a **Third Wall™** to give clients the protection they need and deserve.

## Next-Level Cyber Security

**Third Wall™** directly plugs in to your indispensable Lab Tech Software® to greatly expand the security services you provide. This innovative, highly-affordable plug-in deploys powerful cyber security policies across any or all of your clients, and allows individual exceptions to be made to any policy on any computer.

## Tighten Client Security Monitoring with One Click

With **Third Wall™** and its select automated security services, you can:

-  Differentiate yourself from other MSPs by delivering affordable, or even free, security and protection to your clients.
-  Set yourself apart from other MSPs that simply don't have the same protection to offer, and protect your clients better than ever.
-  Earn more revenue by providing a new service tier and one that lowers your internal costs.
-  Reduce the number and severity of incidents that you have to clean up for your clients, lessening your workload.

# Third Wall for Critical Cyber Security

BY RMMplus

"Third Wall is a product that locks down your Windows devices by removing vulnerable protocols and services, disabling unnecessary features, enforcing secure settings and restricting users from engaging in risky behavior. Third Wall hardens your endpoint devices and improves your operational cybersecurity."

**Ken Knapp, Ph.D., CISSP**  
CEO, CyberSecure Advising.

## FIREWALL

Your firewall, the critical first wall, is often taken for granted. Keep it working and monitored by Lab tech®.

## ANTIVIRUS/ANTI-MALWARE

Your antivirus/anti-malware is your second wall, blocking hackers constantly working to infect your computers.

## Cyber Security THIRD WALL

The Third Wall™ fills the gaping holes left in your cyber security. It's the next level to managing the most secure environment.

## Third Wall

By RMMplus

### New Capability

Offer an affordable, new suite of security services that gives you a commanding low-price tool for protecting your clients. Limit end-user access that can and does cause major issues. Disable legacy protocols that are open doors for hackers and viruses. Improve password protection. And only pay for what you actually use.

### More Time

Lessen your workload by dealing with fewer client cyber security breaches and incidents, and by employing instant-response tools to manage critical breaches, allowing you to focus more on delivering other complementary IT services that add greater value and more revenue.

### Easy to Use

Right on your LabTech® Control Center, effortlessly deploy potent security policies with just a click, accessing more than 35 different policies and rapid-response buttons to assign those policies across any LabTech® Location, and easily make exceptions to any computer.

### Effective Security

Deliver greater control over security policies that remain strong and resilient, and can only be changed by your technician, with LabTech® monitors initiated at deployment to fully safeguard your clients.
